Prof. Dr. Ana Cláudia Carvalho Campina

Universidade Portucalense Infante D. Henrique, IJP – Instituto Jurídico Portucalense, Portugal

Keynote Title: ““The evolution of the Education in Portugal and its Budgetary impact”

Abstract: The Education is a Human Right recognized and protected as European Union and Portuguese Constitutional Fundamental Right. More than the juridical and judicial recognizing and protection, the Education evolution has a direct dependance on the National expenses and investment, meaning that, it is important to understand the Budget Impact, along the last decades. Although all the most different controversies, considering the undoubtable relevance to the human and social “construction”, as a permanent but defined political, economic and financial strategy, the global Portuguese development is understandable by this particular study of the Education impact in the State Budget.

Keywords: Human Rights; Social State; Taxes; Education; Politicization; Portuguese National Budget
